

# Freestanding Uneven Bars 'Club'

1383124

Training a group of gymnasts means working many hours per week on a variety of different elements as gymnasts have different ages, abilities and requirements. Equipping your hall with apparatus specially designed for training seems therefore a logical measure. The versatile training equipment offered by SPIETH has been developed together with world-renowned coaches and is continuously being tested in the daily practice of training halls worldwide. Adaptations are being made frequently to improve every aspect of this equipment and to keep it the best range of training apparatus available.

Built-in transport system

Width adjustment

Rail for uneven bars

## Functional training apparatus

Flexible, versatile and reliable; with these three words the freestanding uneven bars 'Club' can be described. Flexible, because of the user-friendliness of the apparatus. These uneven bars can easily be adjusted to any height and width required. Versatile, because of its applications. The apparatus can function as an easy movable training instrument. Reliable, due to the use of heavy epoxy-coated steel uprights and feet. This multifunctional training instrument is ideal for any training situation.
